

TELEPATHOLOGY

Share Pathology images with other physicians and improve your efficiency.

BENEFITS

- Perform collective pathology reviews from anywhere with any device
- Use videoconference for your reviews
- Immediately access data and images
- Zoom and change focal points similar to a microscope
- Save time and reduce cost with an efficient collaborative solution for sharing secure data
- Exclusive complete viewer features developed by pathologists for pathologists

Collaborate with your pathology colleagues by sharing slide images viewed directly from a web platform.

Acetiam Connect meets the needs and constraints of medical image analysis for telepathology. Thanks to Acetiam's technological partnership with DATEXIM, pathologists can store, view, analyze and share slide images with staff, peers and partners through a complete and secure telepathology solution. Acetiam Connect adapts to your working environment and medical protocols. Through DATEXIM pathology viewer, you can immediately access images, anywhere, on multiple devices.

MICROSCOPE VIEWER

View high quality images, zoom easily on areas of interest, and change focal points. When you come back to a prior image, the viewer automatically locates the last area you have seen. DATEXIM viewer replaces the need for a powerful microscope.

MULTI-DISCIPLINARY USE CASE

TELEPATHOLOGY IN ONCOLOGY: improve communication between physicians and radiologists, particularly when assessing patient tumors. ACETIAM's Telepathology platform is flexible enough to allow exchanges between different medical specialties. The platform offers a better way to assess a patient's illness over an extended period of time.
